COMPANY PROFILE

Larksois Pharma Pvt. Ltd., headquartered in Mumbai, India Larksois Pharma Private Limited is an emerging, global pharmaceutical company with proven capabilities in the areas of product research, manufacturing & marketing.

The Company develops and markets a wide range of quality, affordable generic and branded formulations for multiple markets across the world.

BUSINESS MIX

Over the years, Larksois Pharma has emerged as one of the growing Indian pharmaceutical companies. Our focus was on specialty segments and simultaneously entering the regulated and unregulated markets in Asia, Africa and South America. We are firmly establishing our brands in each market for sustained sales. Larksois has established strong capabilities in the international market with exports contributing a substantial part of the total revenues.

Over the last few years, the Company's business mix has improved with most of its revenues coming from newly developed formulations

MANUFACTURING

An Organizations' capabilities and objectives are strongly reflected in the product it manufactures. The manufacturing competencies and facilities echo the ability to implement its R&D strengths.

Larksois's manufacturing facilities, spread across India, play a critical role in enabling the Company realize its global aspirations, benchmarked to international standards, these facilities are approved by international regulatory agencies like US FDA, UK MHRA, TGA Australia, WHO, and MCC South Africa. The Company has leveraged its strong vertical integration in building a global pharmaceutical powerhouse.

Larksois has collaborated with world-class manufacturing facilities in different countries that are equipped with state-of-the-art infrastructure. The plants have the capacity to handle a flexible product mix and ensure quick product changeovers.

We have the capability to manufacture various dosage forms in the plants like tablets, capsules, injections, ointments and powders.

The plants are designed to cater to the requirements of the various national and international regulatory bodies. The facilities have been audited and approved for compliance with international Current Good Manufacturing Practices (cGMP) as laid down by WHO, US FDA, UK MHRA, ANVISA BRAZIL, MCC South Africa and TGA Australia

Delivering quality products is our topmost concern and our foremost responsibility. Our quality control team checks each batch of every product as per the established Standard Operating Procedures (SOPs). Modern analytical instruments for in-house testing ensure undiluted quality and consistency. The team members are well qualified and specially trained for the activities of the department.

Strict controls are established to ensure that there are no lapses in the entire manufacturing and quality check processes. Our quality assurance team monitors the processes. They constantly update themselves on the developments in the industry and upgrade internal parameters to make sure products of highest quality are manufactured at the plants.

RESEARCH

Larksois Pharma is committed to research as a means of developing innovative and effective medicines. Research drives the company's plans to evolve into a global pharmaceutical company. A focused effort in well-defined areas and an abiding interest in new technology are key features of research efforts. A dedicated team is being set up towards development of novel formulations. Our R&D center is equipped with latest laboratory equipment to formulate and develop new technological innovations. We are working on pioneering innovation in controlled released patentable formulations besides developing the formulations as per the requirements of the market.

Apart from working on improving the quality standards of the existing products, R&D is committed towards development of new formulations and Novel Drug Delivery System. It plays a vital supportive role for other corporate functions as well such as quality assurance and regulatory affairs.

R&D activities are cornered around three main aspects of research namely:

NDDS (New Drug Delivery System) - Involves taking an existing molecule and modifying the delivery/release pattern for better/targeted efficacy of the product.
Formulation and Development - A team of scientists is continuously working on newer formulations to launch as required by the respective marketing teams. With a deadline-oriented work-profile, this team has high responsibility to ensure that it meets the quality parameters while adhering to the time schedule. The current focus is on developing products in the categories of Anti-HIV, Anti-Malarials, oncology, Cardiology and Ophthalmology.

We are committed to research and development with a vision to create pathbreaking health-care solutions. We are proud of the innovative health care products that we bring to the market. It ensures self-reliance and stringent quality control standards resulting in a host of innovative products.

Its focus on drug discovery and advanced drug delivery systems research has resulted in significant progress in its Novel Drug Discovery & Development program and development of platform technologies that are being used to develop value-added generic pharmaceuticals. Company's strong focus on creating Intellectual Property (IP) assets has resulted in generating revenue streams through IP. The Company's overall research prowess enables it to master cutting edge science and technology.

QUALITY

The importance of quality cannot be undermined in any organization. The customers are becoming increasingly demanding with respect to cost, quality and delivery performance. Achieving these three require imbibing the philosophy of 'Quality

Management' into the different levels of the organization. It has to become the very essence of the organization. More so in the case of the pharmaceutical industry.

The Pharma industry is subject to strict quality control and scrutiny. India by far has the largest number of USFDA approved plants, outside of US which exemplifies the increasing focus on quality assurance of the industry.

At Larksois, we take considerable pride in the quality that we ensure and assure. Our operations are guided by our Quality Policy. We believe that quality is the mainstay of competitiveness. We thus constantly create an environment of Quality and Compliance in line with the global best practices.

Quality Assurance is defined as the process of 'providing confidence that requirements will be met through highest quality' and there after systematic activities are put in place to ensure quality requirements for a product or service are fulfilled.

The Quality Assurance (QA) cell at Lark works as a link between research & manufacturing for quality products for customers. It targets at ensuring that Larksois Pharma follows a standardized common quality system ensuring consistency, effectiveness and efficiency during the manufacture of formulations at all sites.

THE QA FOCUSES ON:

Establishing Quality Standards

Developing processes to achieve those standards

Monitoring to ensure Compliance

Upgrading technology standards

Training personnel on quality aspects

The global quality team is engaged in driving the quality philosophy of the organization and assuring that the global standards of good manufacturing are implemented in the best form and spirit at every location during each process.

QA monitors effectiveness of site Quality organization and Manufacturing Quality organization through periodic quality reviews, periodic audits, budgetary reviews and review of compliance to regulatory inspections and customer audits. Quality reviews focus on review of failures, rejections, market complaints, deviations, noncompliance's, product stability, various Corrective and Preventive actions planned, productivity, cost of quality etc. QA also supports the site Quality organization by providing necessary resources, technical guidance and training. QA also continuously endeavors to upgrade skills and competence levels in QC / QA function by introducing advanced technologies.

Enterprises that exemplify leadership in quality not only deliver quality products and services, but also effectively set industry benchmarks and redefine standards for those who share their mission. At Larksois we are constantly endeavoring to achieve excellence.
